3. Obligation to maintain confidentiality in connection with type certificates

The Product Certification Body of TESTEX is subject to the obligation to maintain confidentiality vis-à-vis third parties in accordance with the relevant provisions of its quality management system.

Unless otherwise stipulated in EN 45011 or legal provisions, information on individual products or individual suppliers obtained in the course of product certification may not be communicated to third parties without the written consent of the applicant. In cases where the disclosure of information to third parties is required by law, the supplier will be informed of the information disclosed in the context of such laws.

4. Notification requirement

The manufacturer must notify the Product Certification Body of every change relating to the technical documentation. This applies not only to significant changes, such as the use of a different fireproof material from a different manufacturer in fire protection clothing or the use of new testing equipment in quality control, but also to apparently insignificant changes, such as the new address of the importer of a (unchanged) component. In the event of changes to information which ought to be available according to the above regulations but which is missing from the file of technical documents submitted at the time, the Product Certification Body must nevertheless be notified accordingly.

I affirm that the application with the enclosed documents has been completed truthfully and accurately.
