Application Form - Personal protective equipment (PPE) - Type Examination

Enclosures: General / Technical documentation

- Documentation of the PPE, i.e. technical drawings, possible calculations as well as descriptions of tests performed on prototypes if available; written description of the PPE; photos of the PPE; and if the PPE is manufactured in different sizes: size key / size chart
- Designation of the PPE (Label or template for the label to be created later. The latter must be submitted after completion).
- Description of quality assurance measures regarding purchased products, the production itself and the finished product. Measures for verifying the PPE's conformity with the corresponding specifications and standards.
- Description of the inspection and test equipment used (Internal Quality Management System? Certificates such as ISO 9001 or similar)
- Copy of the manufacturers information in accordance with PSAV AS 2017 5859, SR 930.115, Art. 1, para. 4 and para. 5, respectively PPE Regulation 2016/425, Annex II, point 1.4
- PPE samples in all models for inspection and archiving
(for high visibility clothing: smallest size produced)
- Test reports not older than 5 years as well as clearance certificates for material used

Attachments: Test reports & list of certificates from independent laboratories:

Duty of confidentiality in connection with type certificates

The Notified Body of TESTEX is subject to a duty of confidentiality towards third parties in accordance with the relevant provisions of its quality management system.

Unless otherwise specified in ISO 17065 or in legal provisions, information about individual products or individual suppliers obtained in the course of product certification may not be communicated to third parties without the written consent of the applicant. In cases where the disclosure of information to third parties is required by law, the applicant will be informed of the information passed on in accordance with such laws.

Notification requirement

The economic operator (manufacturer, authorised representative, importer or distributor) must notify the Notified Body of every change related to the technical documentation. This applies not only to significant changes, such as the use of a different fireproof material from a different manufacturer in fire protection clothing or the use of new test equipment in quality controls, but also to minor amendments, such as a new address of the importer of a (unchanged) component. In the event of changes to information which should have been available according to the above regulations, but are missing from the file of technical documents submitted at the time, the Notified Body must nevertheless be informed accordingly.

I certify that the application with the enclosed documents has been completed truthfully and accurately. I also agree with the General Terms and Conditions of Testex AG.
