1 Purpose

The OEKO-TEX® LEATHER STANDARD standard is part of the testing, certification and licensing products offered by the OEKO-TEX Service GmbH (OEKO-TEX®). Further information on the product portfolio can be found on the OEKO-TEX® website (www.oeko-tex.com). A list of OEKO-TEX® approved institutes (institute) can also be found there as well as in Annex 1.

The OEKO-TEX® LEATHER STANDARD (hereinafter referred to as LEATHER STANDARD, the standard or the standard document) defines the general, technical and legal conditions for the testing and certification of leather and skins, leather fibre boards and products manufactured with these materials on the basis of the standard and for the licensing and use of the OEKO-TEX® LEATHER STANDARD trademark.

The applicable Terms of Use (ToU) for all OEKO-TEX® products (standards) as defined in Annex II also apply.

2 Applicability

This standard is applicable, if the material is leather or rather semi-finished leather in the sense of EN 15987 or leather fibre board; and hereby for all levels of production. The standard is also valid for ready-made articles produced with these materials (e.g. leather clothing, made-up leather accessory products).

This standard is also applicable for upholstery material made of leather.

If the leather product (e.g. leather garment) contains also textile and non-textile (e.g. metallic) components, for these components the conditions and criteria of the latest valid OEKO-TEX® STANDARD 100 are applied. The up to date, valid STANDARD 100, which is then co-applicable, is available at the OEKO-TEX® website www.oeko-tex.com and can be downloaded there.

If the character and the used materials of leather shoes permit, also leather shoes can be tested and certified according to LEATHER STANDARD. However, precondition is that the shoes contain a clear part of leather (or leather fibre board). Shoes with a clear part of textile components possibly can be certified according to OEKO-TEX® STANDARD 100. About this the institute has the sole decision.

Other materials with similar characteristic but without leather parts are tested according to OEKO-TEX® STANDARD 100.

目的

OEKO-TEX® LEATHER STANDARD 标准作为检测、认证和授权许可的一部分，由 OEKO-TEX® Service Ltd. (OEKO-TEX®) 提供。有关产品组合的详细信息，请访问 OEKO-TEX® 网站(www.oeko-tex.com)。在网站及附录 1 中，可查看 OEKO-TEX® 成员机构列表。

OEKO-TEX® LEATHER STANDARD (以下简称 LEATHER STANDARD、标准或标准文件) 规定了根据标准检测和认证皮革材料、皮革纤维板、皮和毛皮以及使用这些材料制成的产品，许可和使用 OEKO-TEX® LEATHER STANDARD 商标时使用的通用条件、技术条件和法律环境。

附录 II 中规定的适用于所有 OEKO-TEX® 产品 (标准) 的使用条款(ToU)也同样适用。

适用范围

本标准适用于皮革材料、皮革纤维板材料或 EN 15987 规定的皮革半成品，以及各生产阶段的产品。本标准同样适用于使用这些材料制成的成品 (例如皮革服装、皮革配饰)。

本标准也适用于皮革制成的室内装饰材料。

若皮革产品 (如皮革服装) 还含有纺织品和非纺织 (如金属) 辅料，则这部分适用最新生效的 OEKO-TEX® STANDARD 100 条件和标准。最新适用版的 STANDARD 100，可在 OEKO-TEX® 网站 (www.oeko-tex.com) 进行下载。

若皮鞋的特征和使用材料符合条件，则皮鞋也可根据 LEATHER STANDARD 进行检测和认证。但前提是鞋类明确含有皮革 (或皮革纤维板) 材质。含有纺织品成分的鞋多数情况下可以根据 OEKO-TEX® STANDARD 100 进行认证。对此，认证机构拥有完全的决定权。

其他具有相似性质但不含皮革成分的材料，可根据 OEKO-TEX® STANDARD 100 进行检测。

2.1 Leathers and skins that can be certified

The LEATHER STANDARD is valid for leather and skins, which are accepted for certification by the OEKO-TEX Service GmbH.

Leather and skins from the following animal species can be certified:

Cattle; Sheep; Goat; Pig; Horse. Leathers from other animal species can be certified if the raw hides and skins are a by-product of the meat, milk or wool production which must be proven. In such cases, the possibility of certification can be requested at an approved OEKO-TEX® institute or the OEKO-TEX® Secretariat.

The certification of exotic leather materials from animals like e.g. crocodiles, snakes, armadillos, etc. or of articles, into which such exotic leathers are processed (e.g. bags, belts, shoes, etc.) is not possible. The certification of furs is also not possible (detailed information under item 4.6). In questionable cases the final decision about an approval or exclusion for certification or the rejection lays within the OEKO-TEX® Secretariat (Secretary General). This decision is not contestable.

2.2 Origin

The origin of the processed hide or skin is expected to be known and the source shall be in accordance to CITES (Convention on International Trade in Endangered Species of wild fauna and flora) and other legal requirements.

It is also recommended that hide and skins from animal farming / facilities are used, which are tested for a species-appropriate husbandry, animal welfare, etc.

2.3 Traceability and deforestation

An implemented traceability system and risk analysis is highly recommended to control and monitor the possible involvement of farms and hide or skin suppliers in any way of deforestation to exclude the risk of hide and skins coming from areas of both legal and illegal deforestation. Especially for hide and skins with the origin of Brazil and Paraguay a strict traceability system is highly recommended to exclude any involvement of deforestation in the Amazon Biome.

Physical marking and a reliable data system is recommended to be implemented in the production process to ensure traceability for unprocessed or incoming leather material at least back to the slaughterhouse group, region or country by targeting full transparency back to the farm.

可被认证的皮革和毛皮

LEATHER STANDARD 认证适用于被 OEKO-TEX® Service GmbH 所接受的皮革和毛皮。

以下动物的皮革和毛皮可以进行认证:

牛、绵羊、山羊、猪、马。如果生皮和毛皮被证明是肉类、奶类或羊毛生产的副产品,则其他动物种类的皮革也可以获得认证。在这种情况下,可向经认可的 OEKO-TEX® 机构或 OEKO-TEX® 秘书处申请认证。

对于稀有动物如鳄鱼、蛇、犰狳等皮革材料或制品的认证,若这些稀有皮革已经加工成产品(如提包、皮带、鞋等),则不接受认证。不接受毛皮认证(具体信息详见标准 4.6)。如存在争议,OEKO-TEX® 秘书处(秘书长)有批准或拒绝认证的最终决定。对该决定不得有争议。

原产地

加工的生皮来源必须已知,且应符合 CITES《濒危野生动植物种国际贸易公约》和其他法律要求。

同时,我们建议使用来自动物养殖场/工厂的生皮/毛皮,这些养殖场/工厂已经经过饲养方式、动物福利等检测。

可追溯性和毁林

强烈建议实施可追溯性系统和风险分析,控制和监控农场和生皮供应商可能以任何方式参与滥伐森林的情况,排除生皮来自合法和非法滥伐森林区域的风险。尤其对于产自巴西和巴拉圭的生皮,强烈建议实施严格的可追溯性系统,排除任何涉及在亚马逊生物群落中滥伐森林的情况。

建议在生产过程中实施物理标记和可靠的数据系统,力求能够完全透明地追溯到农场,确保未加工或进厂皮革材料至少可以追溯到屠宰场、地区或国家。

LEATHER
STANDARD

By signing the application for the testing and certification of a material or article the applicant is responsible to comply with the animal and species protection, which are relevant for the product. Regarding to this the OEKO-TEX Service GmbH excludes any liability.

Coated textiles (formerly described as artificial / synthetic leather) are not genuine leather material and have to be certified according to the conditions and requirements of the OEKO-TEX® STANDARD 100.

Textile, non-textile (e.g. metallic) as well as other non-leather materials, which are certified according to OEKO-TEX® STANDARD 100 can be used and accepted within a certification process of a leather product according to the LEATHER STANDARD as pre-certificate, if these materials are certified for the leather product according to the necessary product class.

In a general way it behooves solely the institute as well as possibly also the OEKO-TEX® Secretariat, to reject a testing and certification and not to apply this standard.

The LEATHER STANDARD is not applicable for:

- Textile products and accessories such as metallic materials, plastic accessories etc.: These products are tested and certified according to the OEKO-TEX® STANDARD 100.
- Chemicals, auxiliaries and colourants: These products can be tested and certified according to the OEKO-TEX® ECO PASSPORT.

签署材料/产品的检测及认证申请后，申请人有责任遵守与产品相关的动物和物种保护法。对此，OEKO-TEX® Service Ltd.协会不承担任何责任。

涂层纺织品（以前称为人造革/合成革）不是真正的皮革材料，必须按照 OEKO-TEX® STANDARD 100 的条款和要求进行认证。

通过 OEKO-TEX® STANDARD 100 相应产品级别认证的纺织品、非纺织品（如金属）以及其他非皮革材料，可用于皮革产品的 LEATHER STANDARD 认证过程，可接受并视为经过预先认证。

通常情况下，仅成员机构和 OEKO-TEX® 秘书处有权拒绝检测和认证，或不采用此标准。

LEATHER STANDARD 不适用于：

- 纺织品，以及金属、塑料等材质的辅料：这些产品根据 OEKO-TEX® STANDARD 100 进行检测和认证。
- 化学品、助剂和着色剂：这些产品可以根据 OEKO-TEX® ECO PASSPORT 进行检测和认证。

5 Testing and certification procedure

5.1 General conditions

The terms and conditions for the realisation of the testing and certification process, the performance of these procedures, including the quality assurance and conformity procedures, and the issuing of the OEKO-TEX® LEATHER STANDARD certificate are governed by the Terms of Use (ToU).

The following section provides conditions which are specific to LEATHER STANDARD.

5.2 Product specific requirements

5.2.1 Criteria catalogue according to Annex 4

In addition to the general valid requirements for certification according to LEATHER STANDARD, the product specific requirements, given in Annex 4, have to be fulfilled by each leather of leather fibre board component.

Leather materials are tested in general on both sides of the leather (finished side and flesh side) for the compliance with the colour fastness requirements. For an unrestricted certification and usage of the leather the requirements have to be met from both leather sides. In cases where only the finished leather side is decisive for the further usage of the leather, testing the flesh side is not mandatory for colour fastness. On the certificate an indication will then be given that only the finished leather side was tested for the colour fastness. This is made to point out to following production steps / following users that the usage conditions of the leather are constrained. Leather materials, at which only the finished leather side was tested for compliance with the colour fastness requirements as a result must respectively have to be processed (latest at the final consumer product) in such a way, that the flesh side is covered completely through an additional material and consequently the flesh side shows no direct contact to skin or to other items of clothing / articles.

5.2.2 Other materials

For textile, non-textile (e.g. metallic) as well as other non-leather components and accessories the conditions and criteria of the up-to-date valid OEKO-TEX® STANDARD 100 are effective. For the components, which have to be tested according

检测和认证流程

通用条件

使用条款(ToU)规定了执行检测和认证过程的条款和条件，并管理该过程的执行步骤，包括质量保证和合规性流程，以及 OEKO-TEX® LEATHER STANDARD 证书的签发。

以下为 LEATHER STANDARD 的特殊条件。

产品特定要求

附录 4 的标准目录

除满足 LEATHER STANDARD 认证中的一般有效要求外，皮革纤维板中的各种皮革还需符合附录 4 的特定要求。

为符合色牢度要求，一般对皮革材料的两个面（成品面和皮革内面）都要进行检测。为使皮革的认证和使用不受限制，皮革的两个面都必须满足要求。若只需要成品皮革正面满足使用要求，则不得强制对皮革内面进行色牢度测试。证书上将明确给出只有成品皮革成品皮面完成色牢度测试的说明，这是为了提示后续生产工序/下游用户该皮革的使用条件受到限制。对于仅针对成品皮面进行色牢度测试的皮革材料，成品加工时，需使用其他材料将皮革内面完全覆盖，使内面不与皮肤或其他服装/产品直接接触。

其它材料

纺织品、非纺织品（如金属）及其他非皮革成分和辅料，需符合最新生效的 OEKO-TEX® STANDARD 100 的条款和标准。对于必须根据 STANDARD 100 进行检测的成分，申请人可以选择这些材料应按照国家附录 4 或附录 6 的标准进行检测（请在申请表中进

to STANDARD 100 the applicant can select, if these materials shall be tested according to the criteria of Annex 4 or of Annex 6 of the STANDARD 100 (please select in the application form). Already for materials existing STANDARD 100 certificates can be used and recognised as precertificates if they are issued in accordance with the required product class and the demanded Annex. Where necessary additional tests have to be performed.

5.2.3 Special Articles

For leather, leather fibre boards or skins containing products, that do not represent “classic” articles within the application area of the OEKO-TEX® LEATHER STANDARD such as e.g. leather couches, leather chairs, suitcases, children’s pushchairs, a testing and certification according to OEKO-TEX® LEATHER STANDARD - Supplement Special Articles is possible.

However, for special articles, which contain components made of leather or skins this is possible only if these are mentioned in the list accepted from OEKO-TEX® under chapter 2. Special articles which contain also components of exotic leather materials from animals like e.g. crocodiles, snakes, armadillos, etc. cannot be certified according to the Supplement Special Articles.

5.2.4 New or tightened requirements

Usually the conditions and criteria of the standard are updated and published at the beginning of a new calendar year. However, updates during a calendar year are not precluded.

For new or more severe requirements normally a transition period for implementation is valid until the following 1st of April.

However, the OEKO-TEX Service GmbH at any time has also the right to bring into force and apply immediately new or more severe requirements, if OEKO-TEX® sees the necessity for that.

For further details it is referred to the Terms of Use (TOU).

5.3 Finish with biological active products

The use of finishes with biological active products is accepted within a certification process according to LEATHER STANDARD, when a thorough, separately prior performed special assessment by OEKO-TEX® has shown that the articles finished with the active product according to the recommendations of the manufacturer of the active product are harmless to the human health. The evidence of compliance with the requirements according to Annex 4 of this standard, however, still has to be provided from the finished materials.

行选择)。对于已获得 STANDARD 100 证书的材料，如果符合要求的产品类别和要求的附录，则可以使用该 OEKO-TEX® STANDARD 100 证书并视为经过预先认证。必要情况下，必须进行额外检测。

特殊产品

含有皮革、皮革纤维板或毛皮，但不属于 OEKO-TEX® LEATHER STANDARD 认证范围“典型”产品的，如皮沙发、皮椅、手提箱、儿童手推车等，可根据 OEKO-TEX® LEATHER STANDARD - 补充项目“特殊产品”进行检测和认证。

但如果特殊产品中含有皮革/毛皮制成的组件，只有包含在 OEKO-TEX® 章节 2 的认可清单中时，才可依据“特殊产品”进行检测和认证。含有稀有动物（如鳄鱼、蛇、犰狳等）皮革材料成分的特殊产品，无法根据“特殊产品”进行认证。

新增或更严格的要求

通常在新年伊始时更新和发布新标准。但也不排除在年中更新。

对于新增或更加严格的标准，通常其过渡期实施至 4 月 1 日。

但是，若有必要，OEKO-TEX® 有权在任何时候使新增或更加严格的标准立即生效。

若 OEKO-TEX® 进行全面独立评估后，确认根据活性产品制造商的建议使用生物活性产品制成的产品对人体健康无害，则这些成品可以按照 LEATHER STANDARD 进行认证。但是，仍需证明成品材料符合本标准的附录 4 的要求。

All process preservative agents used to process leather must comply with the limit values mentioned in Annex 4.

用于处理皮革的所有工艺防腐剂必须符合附录 4 中提到的限量值。

5.4 Finish with flame retardant products

阻燃产品后整理

The use of finishes with flame retardant products is accepted within a certification process according to LEATHER STANDARD, when a thorough, separately prior performed special assessment by OEKO-TEX® has shown that the articles finished with the active product according to the recommendations of the manufacturer of the active product are harmless to the human health. The evidence of compliance with the requirements according to Annex 4 of this standard, however, still has to be provided from the finished materials.

若 OEKO-TEX® 进行全面独立评估后，确认根据活性产品制造商的建议使用阻燃产品制成的产品对人体健康无害，则这些成品可以按照 LEATHER STANDARD 进行认证。但是，仍需证明成品材料符合本标准的附录 4 的要求。

5.5 Chrome-free and metal-free tanned products

无铬和无金属鞣制产品

If the applicant wants to have the terms “chrome-free tanned leather” and/or “metal-free tanned leather” mentioned in the scope of the certificate the following requirements need to be fulfilled:

如果申请人希望证书范围中出现“无铬鞣制皮革”和/或“无金属鞣制皮革”等术语，则必须满足以下要求：

The definition of “chrome-free tanned leather” and/or “metal-free tanned leather” according to ISO 15115 (2019) has been considered in tanning process and fulfills the requirements of 3.20 and 3.57 of the ISO 15115 (2019) respectively.

And additional lab test for proof shall be performed and the according limit values can be found in Annex 4.

应进行额外的实验室检测予以证明，相应限量值详见附录 4。

5.6 Testing and certification - execution

检测和认证-执行

The validation for certification in accordance with LEATHER STANDARD must be requested in writing using the application document provided by OEKO-TEX®.

申请 LEATHER STANDARD 认证，需使用 OEKO-TEX® 提供的申请文档，提交书面申请。

In case the article to be certified contains also textile, non-textile (e.g. metallic) or other non-leather components which fall within the application area of the STANDARD 100, the applicant has to select at the application, if these components shall be tested according to Annex 4 or according to Annex 6 of the STANDARD 100.

若认证产品含有适用 STANDARD 100 认证范围的纺织品、非纺织品（如金属）或其他非皮革成分，申请人需在申请表中选出依据 STANDARD 100 附录 4 或附录 6 进行检测。

The application must be submitted to the selected OEKO-TEX® Institute; if applicable even along with representative (production) sample material. Sufficient quantity of the material must be provided mandatory (both for documentation and testing purposes). This requirement also applies when submitting an application for a renewal of a certificate.

申请人应向选择的 OEKO-TEX® 成员机构提交申请；在适当情况下，应随附具有代表性的（大货）样品材料。务必提供足量的材料（供存档及检测用）。本要求同样适用于申请证书续期。

The OEKO-TEX® Institute will review the documents and sample materials which have been sent

in before defining the scope of the tests and putting the selected samples through testing. The type and extent of the (laboratory) tests will depend on the product itself, the material composition, the selected product class and the information provided by the applicant about the product and the manufacturing process.

In case textile materials have to be considered within the OEKO-TEX® LEATHER STANDARD certification process fibre compositions of samples may be cross-checked qualitatively against information from the application, related documents and declarations. These tests are charged to the applicant.

All individual components of an article have to be tested. If the test of a component weighing less than 1 % of the total article is not possible due to the limited amount contained in the article, then the institute decides on its own competence, taking into consideration the kind of article and its use, whether additional testing material has to be sent in or whether the test can be dropped. The decision of the institute is not contestable.

Any valid OEKO-TEX® certificates which are submitted showing that the materials used to manufacture the products have already been certified in accordance with OEKO-TEX® LEATHER STANDARD are taken into consideration when defining the scope of the test.

Materials, which are certified according to OEKO-TEX® STANDARD 100 can be used within the certification process of an article according to LEATHER STANDARD also and valid certificates can be submitted, too.

Test specimens having a non product typical odour (for example fragrance / perfume, mould) or an odour indicating faulty manufacture, will be excluded from testing immediately and no authorization to use the brand OEKO-TEX® LEATHER STANDARD is possible.

After the tests were carried out a report will be provided by the institute to the applicant.

In case the verification was successful the applicant has to sign the necessary Declaration of Conformity (please see for this also to 6.3) and transfers it to the OEKO-TEX® Institute.

After all necessary documents were received the OEKO-TEX® Institute issues the OEKO-TEX® LEATHER STANDARD certificate and transfers it to the applicant.

At initial certification procedures on request of the applicant the date on which the certificate comes into effect and therefore the date from which they are authorised to use the OEKO-TEX® trademark

身、材料成分、附录要求、所选产品级别以及申请人提供的产品和制造过程信息，决定（实验室）检测的类型和程度。

若在 OEKO-TEX® LEATHER STANDARD 认证过程中需要考虑纺织材料，则根据申请、相关文件和声明信息，可能对样品纤维成分进行定量验证分析。检测费用由申请人承担。

必须对组件的所有单个组分进行检测。如果由于组件所含重量有限而无法对重量小于物品总重量 1 % 的部件进行检测，那么检测机构将根据组件的种类和用途，自行决定是否需寄送额外的检测材料或是否可以放弃检测。对该机构的决定不得提出异议。

提交的所有有效 OEKO-TEX® 证书可表明产品制造中使用的材料已根据 OEKO-TEX® LEATHER STANDARD 进行验证，在决定检测范围时都会纳入考量。

通过 OEKO-TEX® STANDARD 100 认证的材料可用于 LEATHER STANDARD 对制品的认证过程，提交有效证书即可。

若检测样品具有与产品无关的典型气味（例如香味/香气、霉味）或表明生产过程有瑕疵的气味，则立即停止检测此类产品，且此类产品将无权使用 OEKO-TEX® LEATHER STANDARD 标签。

检测结束后，机构将向申请人提供检测报告。

成功通过检测后，申请人还需签署符合性声明（请参阅 6.3），并提交 OEKO-TEX® 机构。

OEKO-TEX® 机构收到全部所需文件后，将颁发 OEKO-TEX® LEATHER STANDARD 证书并将其交给申请人。

申请人首次申请认证，证书生效的日期即为授权其使用 OEKO-TEX® 标签的日期，该日期至多可以推迟至检测报告发布日期后三个月。

can be postponed for at most three months from the date of the underlying test report being issued.

By signing and submitting the Declaration of Conformity, the customer accepts that the certified products will be monitored and controlled by OEKO-TEX® and / or the OEKO-TEX® Institute for the purposes of OEKO-TEX® quality assurance (in addition to his own and internally required quality assurance for different finishing batches, different colours, etc.).

As part of a first certification process according to OEKO-TEX® LEATHER STANDARD an On-Site-Visit of the company / production facility is required and must be carried out. This On-Site-Visit is performed by the OEKO-TEX® Institute or a quality assurance officer of the OEKO-TEX Service GmbH either before or soon after the LEATHER STANDARD certification and must be passed. Each company is controlled in this way at least once every three years. Exclusion criteria are defined and represent the most important criteria for determining suitability for certification with an OEKO-TEX® LEATHER STANDARD. All exclusion criteria must be fulfilled if a facility is to be eligible for OEKO-TEX® LEATHER STANDARD certification (see Annex III). In case travel restrictions do not allow a safe performance of an in-person On-Site-Visit, an alternative is available and can be discussed with the corresponding OEKO-TEX® institute. If the assessment is not passed, a previously issued LEATHER STANDARD certificate can be withdrawn.

The customer is entitled to request the renewal of their certificate and with it the license to use the OEKO-TEX® LEATHER STANDARD trademark three months before it expires. The renewal of an existing certificate has to be made seamless to the expiry date of the certificate. The certificate number will remain the same whenever a certificate is seamlessly renewed (subsequent certifications). The expiry date of a renewed certificate will be exactly one year after the expiry date of the previous certificate. Delayed performed renewals will not result in an extension of the certificate validity (see also ToU). The institute normally elaborates a reduced testing programme for the 1st, 2nd, 4th, 5th, etc. renewal, however, under the preconditions that this is possible for the articles in question and they are produced with unchanged manufacturing conditions (materials used, chemicals, etc.) in comparison to the previous certification.

Note: The latest version of the application and the Declaration of Conformity to the OEKO-TEX® LEATHER STANDARD are available to download from the OEKO-TEX® website www.oeko-tex.com.

通过签署和提交符合性声明，客户接受 OEKO-TEX® 和/或 OEKO-TEX® 机构为 OEKO-TEX® 质量保证的目的而对认证产品进行的监督和控制（除了客户自己的和内部要求的不同加工批次、不同颜色等的质量保证之外）。

根据 OEKO-TEX® LEATHER STANDARD 要求，认证必须首先进行企业/生产工厂现场检查。LEATHER STANDARD 认证之前或认证之后较短时间内，由 OEKO-TEX® 机构或 OEKO-TEX® Service Ltd 的检查员进行现场检查，且必须检查通过。每家企业每三年至少检查一次。界定的排除标准是确定 OEKO-TEX® LEATHER STANDARD 认证是否适合的最重要标准。如果某一工厂要符合 OEKO-TEX® LEATHER STANDARD 认证标准（见附件 III），则必须满足所有排除标准。如因路途限制造成无法实现人员安全的现场检查，可与相应的 OEKO-TEX® 机构讨论其他可行方案。如果评估未通过，将撤销之前颁发的 LEATHER STANDARD 证书。

客户可在证书到期前三个月提出续期申请，否则证书过期将失去使用 OEKO-TEX® LEATHER STANDARD 商标的资格。现有证书必须在证书过期日前进行无缝衔接续期。证书续期（后续认证）后，证书编号将保持不变。续期证书的到期日期为原来证书到期日期后的一年。延期续期的证书将无法延长有效期（请参阅 ToU）。在目标制品生产条件同之前的认证相比未发生改变时（所用材料、化学品等），认证机构可慎重决定在第一次、第二次、第四次、第五次等申请续期时减少部分检测项目。

注：可在 OEKO-TEX® 网站 www.oeko-tex.com 下载最新版本的 OEKO-TEX® LEATHER STANDARD 申请表和符合性声明。

Packaging of sample material

样品材料包装

The packaging for test samples must meet specific requirements. Test samples must be individually packaged in tear-resistant polyethylene film or polyethylene film bags to prevent possible dirtying or contamination during transport and cross contamination between samples and to ensure that test results are precise and reproducible. The packaging must be shut with double wrapping and sticking with tape if possible. Adhesive / packaging tape must NOT be used to stick the sample itself shut. Packaging materials must not contain any polyfluorinated or perfluorinated components. The packaging must be packed in a second case that is sealed tight with adhesive tape. Avoid simply packaging the test sample in cardboard boxes and / or paper.

The OEKO-TEX® Institute reserves the right to reject sample material possibly and to request new samples.

If the OEKO-TEX® Institute uses samples for the tests which have not been packaged by the applicant in accordance with these instructions, the applicant accepts that the OEKO-TEX® Institute is not responsible for any “inaccurate” test sample results which are caused by contamination, etc. as a result of the samples not been packaged properly by the customer.

检测样品包装必须符合特定要求。检测样品必须独立分装在防撕裂的塑料膜或塑料袋中，防止运输过程中弄脏或污染，防止样品间的交叉污染，确保检测结果准确、可重现。必须使用双层包装，如有可能，用胶带封口。粘合剂/包装胶带不得用于粘贴样品本身。包装材料不得含有多氟或全氟成分。包装必须置于第二包装材料中，并用胶带密封第二包装材料。避免仅使用硬纸箱和/或纸包装检测样品。

OEKO-TEX®机构保留拒绝样品、要求提供新样品的权利。

若申请人未根据上述说明包装样品，而 OEKO-TEX®机构使用该样品进行检测，即视为申请人同意，当由于客户不当包装样品导致污染等，造成“不精确”的检测样品结果，OEKO-TEX®机构对此不负任何责任。
